Createspace Independent Publishing Platform, United States, 2015. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****.In many respects this is the most satisfactory of the dietary studies thus far published by the U. S. Dept, of Agriculture, partly because a summary only of the results is given in the text and the details reserved for the appendix, and partly because of the variety of occupation and condition of the 23 families. These studies were made among the so-called poor in the worst congested districts of New York, and yet 11 of the 23 families paid daily 20 cents and over per person for food, and 2 of them over 40 cents, while only 3 spent as little as 16 cents. The calculation of the cost of each 1,000 calories in the different dietaries brings out more clearly the lack of economy in buying. A well-selected dietary may be made up so as to cost from 5 to 5.5 cents per 1,000 calories; only 4 of the list given come within this limit, while 8 cost over 7 cents per 1,000 calories, and one of these high cost dietaries furnished the lowest total food value found. -Review of American Chemical Research, Volume 4 [1898].
